Added Tier	

These rates were approved by the Board of Directors at the April 26, 2024 meeting. The tier rate adjustments were made to cover the increased electric rates and to encourage water conservation. Those using 50,000 gallons or less per month will not be affected by the rate increase. Those using 100,000 to 150,000 gallons will see a small increase. Users 150,000 gallons and over will see a substantial increase. It pays to CONSERVE water.
